

Athlete Supervision Policy **For Parents and Guardians**

For all our athlete's safety, they must be supervised and accompanied by a parent or guardian at both training sessions and competition days.

This means you are responsible for their behaviour at all times while at training sessions and competition days and ensure they are following instructions of coaches, KAC committee or parent officials/helpers.

This is for their own safety, and for the safety, comfort and fairness of others.

If a child is found at training and competition days without a parent / guardian present, they cannot participate and will be asked to find and sit with their parent / guardian. They can then rejoin the group when their parent / guardian is present and accompanying them.

Committee members and parent helpers have a right to ask a child / athlete where their parent / guardian is and act in accordance with this policy.

- You cannot drop your child off and leave
- You cannot sit in your car while training / comp is happening
- You cannot sit up on the hill throughout an entire training session or comp day and not accompany your child

Exceptions to the above are:

- 1) If the athlete's parent / guardian is already assisting with another child or out assisting at an event
- 2) If you have prior approval from the committee for parents with babies or with disabilities
- 3) If you have prior approval from the committee to leave your child unattended at training or comp. A reasonable explanation must be provided.

Our club cannot run safely and efficiently without the help of all parents / guardians. Supervising your child will allow fairness for all involved, and ensure a safe and fun environment for everyone.

This policy is to ensure that ALL parents / guardians contribute and get involved in their child's journey with KAC and keep all our athlete's safe.
